Education

IIM Calcutta, IIT Kharagpur, ISI, PGDBA - Business Analytics July 2024 – May 2026

- **Coursework:** Statistical Inference, Machine Learning, Regression and Time Series Models, Deep Learning, NLP
- **Co-Curriculars:** Ranked 1st in NEST(Novartis), Finlytics(IIM C) case competitions

PSG College of Technology, Coimbatore, B.E. Mechanical Engineering Aug 2018 – May 2022

- **Coursework:** Supply Chain Management, Operations Research, Basics of Python
- **CGPA:** 8.58/10.0

Experience

Senior Business Operations Specialist, o9 Solutions – Coimbatore, TN Apr 2024 – Jul 2024

- Played a key role in the successful transition from a weekly to monthly demand planning cycle for a client with >1L SKUs, resulting in better demand planning.
- Introduced item demand segmentation using historical demand patterns, resulting in better algorithm selection and a 30% increase in forecast accuracy along with a 40% reduction in user forecast overrides.
- Conducted knowledge transfer sessions and specific training on demand planning workflows for new resources, resulting in a reduction in onboarding time for new team members.

Business Operations Specialist, o9 Solutions – Coimbatore, TN Aug 2022 – Mar 2024

- Facilitated the development of custom workflows for demand planning in the o9 platform, streamlining processes, and increasing efficiency.
- Created, tested, and debugged R plugins related to statistical forecasting and time series decomposition, enabling accurate and reliable forecasting models.
- Guided exceptional support during the User Acceptance Testing (UAT) phase, resolving client queries and issues promptly, resulting in a 90% client satisfaction rating.

Projects

Model volatility for NIFTY 50

- Modelled daily-return volatility of the NIFTY 50 (1000+ observations) with ARCH(1) and GARCH(1,1), and achieved an RMSE of 0.004 with GARCH fit and yielded one-day-ahead 99% Value-at-Risk estimates.
- Verified all prerequisite assumptions like stationarity via ADF, presence of volatility clustering with ARCH-LM, and serial dependence in squared residuals through ACF/PACF diagnostics.

Product Recommendation System

- Developed a hybrid recommender on Amazon-Electronics (1.5 K users) that blends rank-based popularity, user-based CF (cosine) and SVD with 50 latent factors to deliver personalized top-5 product suggestions.
- Tackled cold-start by defaulting to items with ≥ 50 ratings, stored interactions in a CSR matrix, predicted unknown scores via SVD, and verified reliability with low RMSE between actual and predicted ratings.

Persuasive Car Sales Chatbot for TATA(RAG)

- Fine-tuned TinyLlama-1.1 B with LoRA on multi-turn persuasive car-sales dialogues and deployed it as the generation engine in a RAG chatbot.
- Engineered a FAISS vector store with BGE embeddings from web data, Tata brochures, and FAQs, enabling low-latency semantic retrieval that feeds the chatbot's sales-focused answers.

Certifications and Technical Skills

- **Languages:** Python, R, SQL
- **Certifications:** Winter School of Deep Learning(ISI), Business and Operations Analytics by IIM Mumbai
